Walking Leg Bin Fill

USC®
Seed Treating Solutions®

USC's Walking Leg option *is an innovative alternative to filling bins. Use to save* TIME *and* SPACE!

USC's Walking Leg is the perfect solution for sites that may not have as much space for a standard Bin Fill Conveyor, or for those who want to make filling bins an incredibly easy process!

Easily control the Walking Leg by remote as it moves from bin to bin filling directly from the truck. Now it's even easier to fill multiple bins!

Quick Facts & Stats:

- Easily fill bins directly from truck without bin fill conveyor
- Move the leg via remote as it fills each bin
- Top conveyor easily fills each bin: 12' in length
- Walking Leg takes a smaller 'footprint' area when space is limited
- Capacity matches other USC products of 1,800 lbs./min.
- Lead time: 16 weeks
- Walking Leg is easier to clean out vs. overhead system
- Controlled from the ground - no need to climb
- Seed bins are sealed shut when not filling; easily move for lid to close
- Cleaner than overhead system:
    - No birds nests, leaks into bins, or ice on belt
