

FLXTOR® IS THE ONLY DEALER TO GROWER BULK SEED DELIVERY SYSTEM *designed to move treated seed without the use of bulk bags or pro boxes.*

USC's Flxtor® line of products improves seed handling efficiencies after treating the seed by going directly into the Flxtor® system. Flxtor® Transformer, Seed Pods and Seed Pod Shuttle work together providing convenience for storing seed in weatherproof pods with the flexibility to move pods anytime, anywhere.

FLXTOR® SEED PODS:

- Up to 400-Unit Seed Pods available
- 12-gauge steel construction at 102" wide and 144" long
- Perfectly fits on the seed transformer
- Pivoting legs are locked into standing position - no tools required
- Offers the flexibility that stationary bins don't offer
- Completely sealed containment with security latch lids

FLXTOR® TRANSFORMER:

- Deliver seed to any location, even before it's needed
- Hydraulically controlled conveyor gives full 180-degree swing
- Triple axle sub-frame allows even weight distribution
- Hydraulic push slides conveyor under the bin for no-mess clean out
- Complete with self contained generator for out-in-the-field power
- Encased controls run the bin drop and planter delivery conveyors

FLXTOR® SEED SHUTTLE:

- Advantages of delivering in bulk
- Directly deliver full pods
- Ability to re-fill directly from a conveyor
- Eliminates loading and unloading heavy bags and boxes
- Store fall, winter and spring seed types
