

# LPH800 SEED TREATER

The LPH800 offers a continuous flow treating system, and includes USC's patented slide-out atomizer for easier cleaning and inspection access. This system is ready to operate with a 6' drum, stainless steel mix tank, pumping system and control panel.

## FEATURES & ADVANTAGES

- 800 lb./min. (soybeans)
- Electrically-driven rotary atomizer for treatment distribution.
- One-man operation.
- Proximity switches for automatic shut-off of pump and inlet conveyor.
- 230V, 1PH electrical panels.
- Easy slide-out atomizer.
- Variable output peristaltic pump.
- 30 gal. stainless steel mix tank with agitation.
- 340 oz. calibration tube.
- Adjustable seed flow gate.
- Inlet and outlet conveyor controls.
- Conveyor controls manage 5HP motor.
- Dimensions:
  - Adjustable Height: 75" to 104"
  - Width: 46"
  - Length: 121"
