

HUB BLENDING SYSTEM

Blend up to 20 unique seed treatments, applications or ingredients at once with USC's revolutionary HUB blending system. With real-time blending, the latest automation platform and ability to apply liquid or dry ingredients, this plug-and-go system provides the most accurate and efficient solution for any-sized seed treating operation.

FEATURES & ADVANTAGES

- Blend and apply up to 20 ingredients at once with up to 16 automated and four "hand-add" slots.
- Optional 8 or 16-ingredient automated controls.
- Liquid and dry ingredients can be applied through USC's rapid agitation design.
- Simple plug-and-go system provides quick connections, minimal installation and pre-plumbed lines with 25-feet of wire re-inforced tubing.
- Designed to accurately batch multiple ingredients into suspension, providing real-time blending.
- Compatible with USC's U-Treat 4.0 automation platform.
- Control HUB blending system via mobile device.
- Includes transfer pump with air purge functionality.
