

# LOCK & LOAD DRY ADDITIVE FEEDER

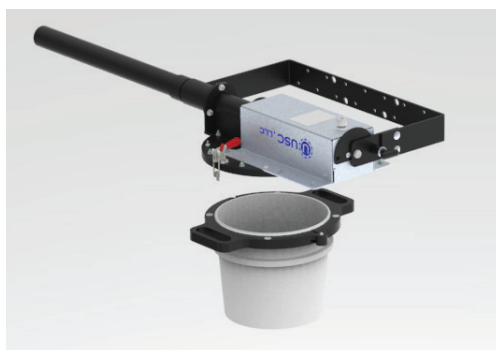

The Lock & Load dry additive feeder's (DAF) revolutionary design eliminates the traditional dust and mess dry additive feeders are commonly known for. Simply clip the industrial strength magnetic collar to any product-filled bucket, lock in place, flip and apply! Choose a mounted stand to apply product as seed exits to the conveyor, or a universal bracket to create an attachment to any seed tender.

## FEATURES & ADVANTAGES

- AT500P mount has a 2" diameter, 1' auger for metering.
- Dispersion screen (optional), calibration port, and mounting stand included.
- Hand/Off/Auto control toggle; auxiliary cord for auto control from treater.
- Digital screen with 10 turn dial for precise motor control.
- Auger provides consistent and accurate coverage.
- Includes 90V DC variable speed motor.
- Operates off 120V or 12V.

The simple design offers quick and easy calibration, while the 90V variable speed motor provides variable flow ranges, maximizing versatility. The Lock & Load dry additive feeder works on AT500H/AT500P models and all drum treaters.
